

TRAINING COURSES & SEMINARS

We offer targeted and practice-oriented training courses and seminars on everything to do with rail vehicles.

Our services extend to training courses on brake tests according to Maintenance Guideline (VPI), German Federal Railway (DB) and International Union of Railways (UIC), dangerous goods training, valve training, as well as basic training on freight wagons and maintenance. Our portfolio also includes other rail vehicles such as passenger carriages as well as construction and auxiliary vehicles. We target both workshops and maintenance staff.

Our competent team of trainers, with their many years of professional experience, will assure the success of our professional and continuing further training. Modern teaching methods and technical equipment as well as practical training on actual equipment will assist you in achieving your learning goals.

In-house training courses and training courses in your national language (EU) with an interpreter if necessary, are also possible.

We are flexible in terms of time and location - arrange your desired appointment with us. We would be happy to make you an individual offer.
